

# Glottometrics 1 – 30

Using the jubilee of *Glottometrics*, we are glad to present a complete bibliography of all publications of the first 30 issues. The contributions are ordered in 5 sections: (1) General articles, (2) History, (3) Reviews, (4) Bibliographies, and (5) Miscellanea. Within each of these sections, the contributions are ordered according to authors' names and year of publication. The Bibliography can be downloaded as PDF-file from: [www.ram-verlag.eu/](http://www.ram-verlag.eu/)

Peter Grzybek, Emmerich Kelih

## 1. General Articles

- Adamic, Lada A.; Huberman, Bernardo A.** (2002). Zipf's law and the Internet. *Glottometrics*, 3; 143–150.
- Altmann, Gabriel** (2002). Zipfian Linguistics. *Glottometrics*, 3; 19–26.
- Altmann, Gabriel** (2004). Script complexity. *Glottometrics*, 8; 68–74.
- Altmann, Gabriel** (2014). On morphological complexity in Indonesian. *Glottometrics*, 29; 59–69.
- Altmann, Gabriel; Popescu, Ioan-Iovitz; Zotta, Dan** (2013). Stratification in texts. *Glottometrics*, 25; 85–93.
- Andersen, Simone** (2002). Freedom of choice and psychological interpretation of word frequencies in texts. *Glottometrics*, 2; 45–52.
- Andersen, Simone** (2002). Speaker's information content: frequency-length correlation as partial correlation. *Glottometrics*, 3; 90–109.
- Andersen, Simone** (2005). Word length balance in texts: Proportion constancy and word-chain-lengths in Proust's longest sentence. *Glottometrics*, 11; 32–50.
- Andreev, Sergey** (2007). Some properties of a metalinguistic verbal system (in the metalanguage of the Macmillan English Dictionary's defining vocabulary). *Glottometrics*, 14; 21–31.
- Andreev, Sergey** (2012). Literal vs. Liberal Translation – Formal Estimation. *Glottometrics*, 23; 62–69.
- Andres, Jan; Benešová, Martina** (2011). Fractal analysis of Poe's *Raven*. *Glottometrics*, 21; 73–98.
- Antić, Gordana; Altmann, Gabriel** (2005). On letter distinctivity. *Glottometrics*, 9; 46–53.
- Araujo, Leonardo C.; Cristófaros-Silva, Thaïs; Yehia, Hani Camille** (2013). Entropy of a Zipfian Distributed Lexicon. *Glottometrics*, 26; 38–49.
- Baevskij, Vadim S.** (2011). Academician Andrey Nikolaevich Kolmogorov as a Scholar of Verse Theory. *Glottometrics*, 22; 17–43.

- Baevskij, Vadim S.** (2012). Non-traditional approach to the study of the rhythmic of Russian verse. *Glottometrics*, 24; 5–11.
- Balasubrahmanyam, Viddhachalam K.; Naranan, Sundaresan** (2002). Algorithmic information, complexity and Zipf's law. *Glottometrics*, 4; 1–26.
- Beliankou, Andrei; Köhler, Reinhard** (2010). The distribution of parts-of-speech in Russian texts. *Glottometrics*, 20; 59–69.
- Best, Karl-Heinz** (2001). Zur Gesetzmäßigkeit der Wortartenverteilungen in deutschen Presstexten. *Glottometrics*, 1; 1–26.
- Best, Karl-Heinz** (2002). Der Zuwachs der Wörter auf *-ical* im Deutschen. *Glottometrics*, 2; 11–16.
- Best, Karl-Heinz** (2002). The distribution of rhythmic units in German short prose. *Glottometrics*, 3; 136–142.
- Best, Karl-Heinz** (2003). Spracherwerb, Sprachwandel und Wortschatzwachstum in Texten. Zur Reichweite des Piotrowski-Gesetzes. *Glottometrics*, 6; 9–34.
- Best, Karl-Heinz** (2004). Zur Ausbreitung von Wörtern arabischer Herkunft im Deutschen. *Glottometrics*, 8; 75–78.
- Best, Karl-Heinz** (2005). Sprachliche Einheiten in Textblöcken. *Glottometrics*, 9; 1–12.
- Best, Karl-Heinz** (2005). Turzismen im Deutschen. *Glottometrics*, 11; 56–63.
- Best, Karl-Heinz** (2005). Zur Häufigkeit von Buchstaben, Leerzeichen und anderen Schriftzeichen in deutschen Texten. *Glottometrics*, 11; 9–31.
- Best, Karl-Heinz** (2006). Deutsche Entlehnungen im Englischen. *Glottometrics*, 13; 66–72.
- Best, Karl-Heinz** (2006). Gesetzmäßigkeiten im Erstspracherwerb. *Glottometrics*, 12; 39–54.
- Best, Karl-Heinz** (2006). Wie viele Morphe enthalten Wörter in deutschen Presstexten? *Glottometrics*, 13; 47–58.
- Best, Karl-Heinz** (2007). Quantitative Untersuchungen zum deutschen Wörterbuch. *Glottometrics*, 14; 32–45.
- Best, Karl-Heinz** (2007). Zur Entwicklung des Wortschatzes der Elektrotechnik, Informationstechnik und Elektrophysik im Deutschen. *Glottometrics*, 15; 24–27.
- Best, Karl-Heinz** (2008). Das Fremdwortspektrum im Türkischen. *Glottometrics*, 17; 8–11.
- Best, Karl-Heinz** (2008). Sinismen im Deutschen und Englischen. *Glottometrics*, 17; 87–93.
- Best, Karl-Heinz** (2008). Word length in Persian. *Glottometrics*, 16; 27–30.
- Best, Karl-Heinz** (2008). Zur Diversifikation lateinischer und griechischer Hexameter. *Glottometrics*, 17; 43–50.
- Best, Karl-Heinz** (2009). Diversifikation des Phonems /r/ im Deutschen. *Glottometrics*, 18; 26–31.
- Best, Karl-Heinz** (2009). Wortlängen im Englischen. *Glottometrics*, 19; 1–10.
- Best, Karl-Heinz** (2009). Zur Entwicklung der Entlehnungen aus dem Japanischen ins Deutsche. *Glottometrics*, 19; 80–84.
- Best, Karl-Heinz** (2010). Zur Entwicklung des Wortschatzes der deutschen Umgangssprache. *Glottometrics*, 20; 34–37.

- Best, Karl-Heinz** (2011). Diversification of a single sign of the Danube script. *Glottometrics*, 22; 1–4.
- Best, Karl-Heinz** (2011). Silben-, Wort- und Morphemlängen bei Lichtenberg. *Glottometrics*, 21; 1–13.
- Best, Karl-Heinz** (2011). Word length distribution in French. *Glottometrics*, 22; 57–61.
- Best, Karl-Heinz** (2012). Diversifikation der starken Verben im Deutschen. *Glottometrics*, 24; 1–4.
- Best, Karl-Heinz** (2012). Längen von Komposita im Deutschen. *Glottometrics*, 23; 1–6.
- Best, Karl-Heinz** (2012). Zur Verslänge bei G.A. Bürger. *Glottometrics*, 23; 56–61.
- Best, Karl-Heinz** (2013). Iranismen im Deutschen. *Glottometrics*, 26; 1–8.
- Best, Karl-Heinz** (2013). Zur Verslänge im Altisländischen. *Glottometrics*, 25; 22–29.
- Best, Karl-Heinz** (2014). Hebraismen im Deutschen. *Glottometrics*, 27; 10–17.
- Best, Karl-Heinz; Altmann, Gabriel** (2005). Some properties of graphemic systems. *Glottometrics*, 9; 29–39.
- Best, Karl-Heinz; Zhu, Jinyang** (2010). Ein Modell für die Zunahme chinesischer Schriftzeichen. *Glottometrics*, 20; 29–33.
- Brüers, Nina; Heeren, Anne** (2004). Pluralallomorphe in Briefen Heinrich von Kleists. *Glottometrics*, 7; 85–90.
- Buk, Solomija; Mačutek, Ján; Rovenchak, Andrij** (2008). Some properties of the Ukrainian writing system. *Glottometrics*, 16; 63–79.
- Čech, Radek** (2014). Four reasons for a revision of the transitivity hypothesis. *Glottometrics*, 27; 1–9.
- Čech, Radek; Mačutek, Ján** (2009). Word form and lemma syntactic dependency networks in Czech: a comparative study. *Glottometrics*, 19; 85–98.
- Čech, Radek; Popescu, Iovitz; Altmann, Gabriel** (2011). Euphony in Slovak lyric poetry. *Glottometrics*, 22; 5–16.
- Čech, Radek; Popescu, Iovitz; Altmann, Gabriel** (2011). Word length in Slovak poetry. *Glottometrics*, 22; 44–56.
- Chen, Ruina; Altmann, Gabriel** (2015). Conceptual inertia in texts. *Glottometrics*, 30; 73–85.
- Chen, Heng; Liu, Haitao** (2014). A diachronic study of Chinese word length distribution. *Glottometrics*, 29; 81–94.
- Dębowski, Łukasz** (2002). Zipf's law against the text size: a half-rational model. *Glottometrics*, 4; 49–60.
- Dshurjuk, T. V.; Levickij, Viktor V.** (2003). Satztypen und Satztlängen im Funktional- und Autorenstil. *Glottometrics*, 6; 40–51.
- Dzhuriuk, Tetiana** (2006). Sentence length as a feature of style (applied to works of German writers). *Glottometrics*, 12; 55–62.
- Eeg-Olofsson, Mats** (2009). A word length regularity and its genesis. *Glottometrics*, 19; 49–69.

- Fengxiang, Fan** (2006). Models for dynamic inter-textual type-token relationship. *Glottometrics*, 12; 1–10.
- Fengxiang, Fan; Altmann, Gabriel** (2008). On meaning diversification in English. *Glottometrics*, 17; 66–78.
- Fengxiang, Fan; Grzybek, Peter; Altmann, Gabriel** (2010). Dynamics of word length in sentence. *Glottometrics*, 20; 70–109.
- Fengxiang, Fan; Popescu, Ioan-Iovitz; Altmann, Gabriel** (2008). Arc length and meaning diversification in English. *Glottometrics*, 17; 79–86.
- Fengxiang, Fan; Yaquin, Wang; Zhao, Gao** (2014). Some macro quantitative features of low-frequency word classes. *Glottometrics*, 28; 1–12.
- Fenk-Oczlon, Gertraud; Fenk, August** (2002). Zipf's Tool Analogy and Word Order. *Glottometrics*, 5; 22–28.
- Ferrer-i-Cancho, Ramon** (2005). Hidden communication aspects in the exponent of Zipf's law. *Glottometrics*, 11; 98–119.
- Ferrer-i-Cancho, Ramon** (2013). Hubiness, length, crossing and their relationships in dependency trees. *Glottometrics*, 25; 1–21.
- Ferrer-i-Cancho, Ramon; Servedio, Vito** (2005). Can simple models explain Zipf's law for all exponents? *Glottometrics*, 11; 1–8.
- Gnatchuk, Hanna** (2015). Phonosemantic features of English and German consonants. *Glottometrics*, 30; 1–18.
- Grzybek, Peter** (2007). On the systematic and system-based study of grapheme frequencies. A re-analysis of German letter frequencies. *Glottometrics*, 15; 82–91.
- Grzybek, Peter; Altmann, Gabriel** (2002). Oscillation in the frequency-length relationship. *Glottometrics*, 5; 97–107.
